INFRASTRUCTURE

TOTAL AREA 8000 M² & COVERED 4300 M²
STEEL WORK BUILDING: 2700 M²
STAINLESS STEEL SHOP: 1300 M²

WORKSHOP FOR STRIPPING, DEGREASING AND PASSIVATION (BY DIPPING OR SPRAYING) WITH RECYCLING OF WASTE: 250 M²

MAIN EQUIPEMENTS :

ROLLING MACHINE (3000 X 10 ET 2000X25)
GUILLOTINE: (L=3000 X 10)
PRESS BRAKE 400 T (L=5000) AND 125 T (L=3000)
PRESS BRAKE 400 T (L=5000)
AUTOMATIC WELDING ARM FOR 4 TO 20 MM THICKNESS
3 "TIG ORBITAL" WELDING STATIONS Ø 15 TO 80
1/2 SHELL SHAPER SIZE: 50, 80 AND 120
MECHANICAL BENDER
ENDOSCOPE WITH VIDEO RECORDER.

INFRASTRUCTURE

Creation date: 1962

Turnover 2009: 6.9 M €

No of employees: 51

QMOS certification Number
- 79 for stainless steel
- 22 for steel

Management Team

CEO: Didier LESCAUT

Technical Sales:

Boiler Making: Christophe REY

Piping: Didier COMTE, Frédéric MOUSSET & Jean-Luc DION

Export Sales: Pauline LESCAUT

OUR PARTNERSHIPS

PREPARATION CONTAINER: LESCAUT SAS provides customized preparation containers for preparation of chamber, size, ports, etc.

AERATOR: LESCAUT SAS manufactures aerators used for filtering or removal of gases by using various methods such as vacuum degasifying.

ASEPTIC TANK: LESCAUT SAS provides aseptic tanks with custom tray preparation or storage, with a system for injecting steam and nitrogen.

CIP TANK: LESCAUT SAS manufactures equipment with an integrated cleaning system; this device uses largely automated programs with successive different cleaning, disinfection and finishing with a rinse cycle.

SKIDS: Equipments and piping in the skids are designed, manufactured, tested and automated in the workshops as per customer specifications. LESCAUT SAS takes into account all ergonomics, dimensional and maintenance aspects.

PIPING FOR UTILITIES & PROCESS: LESCAUT SAS builds piping systems that ensure efficient transportation of liquids and gases through valves and other control devices, such as sensors for the measurement of pressure, flow and temperature of transmitted fluids.
