 - Biotherm Monaco
 - Galderma
 - FLAMEL
 - MERIAL

MIXING TANK:
The range of mixers designed by LESCAUT SAS adapts to the customer requirements for the agitators, as defined by the required mixing time, viscosity of mixing fluids and temperature. LESCAUT SAS provides technical expertise in selection among the choice of agitators by working in close collaboration with the suppliers

EPPI TANK:
LESCAUT SAS manufactures storage tanks EPU (Purified Water) and EPPI (Purified Water for Injections) as per customer requirements.

SKIDS:
Equipments and piping in the skids are designed, manufactured, tested and automated in the workshops as per customer specifications. LESCAUT SAS takes into account all ergonomics, dimensional and maintenance aspects.

PIPING FOR UTILITIES & PROCESS:
LESCAUT SAS has extensive experience in designing, manufacturing and commissioning of piping specifications for utilities and process industries as provided by the customers.
